

SUNANDA VEMPATI

Blockchain Architect | Smart Contract Architect | Technical Lead | Web3 Consultant

su.vempati@gmail.com | + 91 77028 00803 | Hyderabad, IN | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Blockchain architecture and smart-contract engineering professional with 15+ years of IT experience and 7+ years in blockchain, specializing in RWA, DeFi, token infrastructure, governance, cross-chain systems and blockchain-powered ecosystems.

Hands-on expertise across Solidity, Rust, EVM and Solana, spanning protocol architecture, smart-contract development, security reviews, testing, audit preparation, deployment and technical consulting. Experienced in translating complex business requirements into secure blockchain solutions while providing SME-level technical guidance.

CORE EXPERTISE

Architecture: Smart Contract Architecture · Protocol Design · RWA Tokenization · DeFi · Multi-chain & Cross-chain · Token Infrastructure

Blockchain: Solidity · Rust · EVM · Solana · Ethereum · Avalanche · Polygon · Arbitrum · Base · BSC

Standards & Protocols: ERC-20 · ERC-721 · ERC-1155 · ERC-3643 · ERC-4907 · ERC-5218 · Stablecoins · Governance · Lending · Staking

Infrastructure: CREATE2 · LayerZero-oriented Architecture · Fireblocks · MetaMask · Phantom · Multisig · Oracles

Security & Tooling: OpenZeppelin · Slither · MythX · Mythril · Hardhat · Ethers.js · Web3.py · Audit Preparation · Contract Verification

Leadership: Blockchain SME · Architecture Reviews · Technical Guidance · Client Consulting · Requirements Analysis · Stakeholder Collaboration

PROFESSIONAL EXPERIENCE

Maavatar | Smart Contract Manager / Blockchain SME (Full-time) *Dec 2024 – Feb 2026*

Core blockchain SME and technical contributor to the development of a blockchain-powered metaverse ecosystem supporting digital identity, assets, NFTs, ownership and Web3 interactions.

- Designed and developed Solidity smart contracts and ERC-1155 dynamic NFT infrastructure.
- Worked on mutable metadata, evolving digital identities, NFT tiers and digital asset ownership.
- Supported wallet connectivity, Web3 integration and interoperability across NFT, DeFi and DAO components.
- Provided blockchain technical direction and helped translate metaverse product requirements into on-chain architecture.
- Contributed to architecture decisions, security analysis, testing, deployment and blockchain/application integration.

Brane Enterprises Pvt. Ltd. | Senior Blockchain Developer *Aug 2022 – Nov 2024*

- Designed, developed, tested and deployed Solidity smart contracts and decentralized applications.

- Worked across token infrastructure, Web3 integrations and EVM-compatible blockchain environments.
- Contributed to smart-contract architecture, security reviews, vulnerability analysis and gas optimization.
- Supported blockchain integrations, deployment and production troubleshooting.

G Future Tech Pvt. Ltd. | Blockchain Developer *Apr 2021 – Aug 2022*

Developed Solidity smart contracts and blockchain applications across EVM environments, supporting token functionality, Web3 integration, testing, deployment, verification and security analysis.

Zeromile Research & Development LLC | Blockchain Developer *Feb 2021 – Mar 2021*

Contributed to smart-contract development, decentralized application implementation, testing and blockchain integration.

ThynkBlynk Technologies | Blockchain Intern *Sep 2020 – Dec 2020*

Built foundational hands-on experience in Solidity, smart contracts and decentralized application development.

FREELANCE & CONSULTING

AppMindsGlobal | SME-Blockchain Consultant (Freelance) *May 2026 – Present*

- Design and develop multi-chain token and RWA infrastructure across EVM and Solana-oriented environments.
- Work across token deployment, bridging, vesting, staking and token lifecycle architecture.
- Contribute to CREATE2 deterministic deployment and LayerZero V2/OFT-oriented cross-chain architecture.
- Build and support deployment automation, contract verification, testing, security review and audit handoff.
- Translate business requirements into blockchain architecture and provide technical consulting.

Featured: RBC / FRK — Multi-Chain Token Infrastructure

Multi-chain token deployment, deterministic CREATE2 architecture, cross-chain infrastructure, LayerZero-oriented design, deployment automation and contract verification.

G Future Tech | Blockchain Consultant & SME (Freelance) *Oct 2024 – Jul 2026*

Freelance consulting and SME engagement, following an earlier role at G Future Tech (2021–2022), across crypto-backed and RWA-backed financial ecosystems, combining smart-contract engineering with protocol architecture, governance and DeFi.

REAL Governance

- Contributed to smart-contract and protocol infrastructure for blockchain-based governance and on-chain execution.
- Worked across governance mechanisms, protocol logic, testing, security and deployment workflows.

USDAO

- Contributed to crypto-backed and RWA-backed financial infrastructure, including stablecoin and DeFi mechanisms.
- Worked across collateralization, lending/borrowing, liquidity, governance, oracle integration and liquidation/recovery mechanisms.
- Contributed to smart-contract architecture, protocol development, security analysis and deployment.

Consulting & SME Contribution

- Provided blockchain SME expertise and technical guidance across architecture and implementation decisions.
- Translated product requirements into blockchain solutions and collaborated with engineering/product stakeholders.

- Supported testing, security reviews, audit preparation and production-oriented deployment.

RealProton | Blockchain Consultant & SME (Consulting)

- Provided SME guidance on ERC-3643 identity, claims, registry, compliance and controlled-transfer design for real-estate tokenization.
- Advised on Fireblocks custody architecture and supported audit preparation, redeployment, verification and Avalanche deployment.

SELECTED BLOCKCHAIN ARCHITECTURE & PROJECTS

USDAO / HydraLend — DeFi & Asset-Backed Infrastructure

Crypto/RWA-backed financial infrastructure spanning stablecoins, collateralization, lending/borrowing, oracle integration, liquidity, liquidation/recovery and multi-collateral concepts.

Maavatar — Blockchain-Powered Metaverse

Blockchain infrastructure for digital identity, ERC-1155 dynamic NFTs, evolving metadata, digital assets, ownership, wallets and Web3 ecosystem interoperability.

Decentralized Rights Management

ERC-5218 / ERC-4907-based infrastructure supporting transferable rights, time-bound NFT rentals, leasing, revocation and IPFS metadata.

Additional Engineering

Ethereum NFT Marketplace · ETH-backed Stablecoin & Governance · Stablecoin Staking Protocol · JSON-to-Solidity Translator & Deployment System

EARLIER IT EXPERIENCE

MAPS Investments FZ LLC, Dubai — IT Support Engineer | Dec 2014 – Apr 2015

Octagon International, Dubai — IT Support Engineer | Jan 2014 – Nov 2014

Diodes IT Services, Dubai — Software Testing Engineer | Dec 2012 – Dec 2013

Infosys Limited, Hyderabad — Software Testing Engineer | Jul 2008 – Sep 2011

At Infosys, worked across enterprise software testing, UAT, process-data validation and CMMI Level 5-oriented quality processes. Received a Unit Level Outstanding Performance Award for contributions to knowledge management, training, tools and employee engagement.

EDUCATION & CONTINUOUS LEARNING

Quantum Computing — Ongoing Study | Indian Institute of Science (IISc), Bengaluru

PG Diploma in Software Development — Blockchain Specialization | IIIT Bangalore & upGrad | 2019 – 2020

PG Diploma in Management | Indira Gandhi National Open University | 2009 – 2012

B.Sc. — Mathematics, Physics & Electronics | Osmania University | 2005 – 2008

PROFESSIONAL DEVELOPMENT

DeFi Primitives — Coursera · Understanding Blockchain Technology — Udemy · Hyperledger Fabric v2 Bootcamp — Chainstack · Blockchain Technology & Applications — Dr. M.G.R. Educational and Research Institute · Blockchain/Smart Cities Webinar — IEEE Computer Society Kerala Chapter
